

Material selection & project brief

A practical checklist for packaging and component development.

Application & function

What must the part protect, support, insulate or contain? Describe the complete assembly and intended service life.

Notes: _____

Geometry & interfaces

Record dimensions, contact areas, clearance, fastening, closure and servicing access. Attach the drawing revision.

Notes: _____

Exposure & loading

State temperatures, repeated loads, impact directions, moisture, cleaning and handling conditions.

Notes: _____

Material & process

Compare candidate grades with the same requirements. Review moulding, forming, cutting and assembly options.

Notes: _____

Packaging journey

Document payload, stacking, loading, storage, route and unloading. Define return arrangements for reusable formats.

Notes: _____

Validation & documentation

Agree representative samples, test methods, acceptance criteria and any required grade-specific documentation.

Notes: _____

Next life & recovery

Record reuse cycles, inspection, separation and the local recovery routes available.

Notes: _____

Commercial brief

Include expected quantities, timing, sample needs and technical contact. Email your brief to sales@parknonwoven.com.

Notes: _____
